ONE OF THE GARDEN SPOTS OF THE WORLD.

Fertile Soil Abundant Water and Other Inducements Offered

to Home Seekers.

From N. M. Bureau of Immigration Report, western slope of the great continental divide, being part of the Pacific water-shed. Aside from its great resources as an agricultural and stock country its scenery is very beautiful. On all sides great rocky masses, broken into picturesque formations. are to be seen across wide, fertile valleys. The county is watered by three large rivers, and from their junction below Farmington the view sufficient to irrigate 1,000,000 acres planted, and in 1832 about 50,000 is grand and impressive.

FARM LAND ON THE SAN JUAN. ten miles above Largo, there is a acres available for irrigation. In querque Territorial fair the fruits of narrow strip of bottom land on each addition to the value of the water for this county took the sweepstakes side of the river. At the town of irrigation, it is a constant source of prize The peaches in some instances Largo the river bottom widens out water power. The San Juan and measured nine inches in circumferinto rolling mesas and bottom lands which are available for cultivation. The most important of these tracts are known as the Bioomfield and Solomon mesas, which, with the bottom somewhat over 20,000 acres. They present the only use made of all this curate account has been kept for four are on be north side of the river. From Lance to the junction of the Animas, the mesa lands are broken is under ditches owned by small assointo etached plateaus rather difficult | ciations of facmers. to irrigate The Anima-Plata empty into the San Juan near

Farmington. On the two points of land formed by the rivers are about 12,000 or 15,000 acres of fine land all under ditet. Beginning then at the mouth of the La Plata, and for twenty large stores, hotel and livery and barley, \$1.40; corn, \$1.50; bran, per it breaks through the Hogback, (a) line of low local) there is a continu | The surrounding country is well such as Irish potatoes, turnips and ous series of me with about a mile cutivated, the farms extending up beets, to the more tender melons, eggwide of bottom that A little over and down the river for several miles plants, tomathes, etc. At this point the vailey is about two meadow .

tain 44.000 Blanco and Canon Gallego, These 550 and 600 persons will include the land along the river and down to the sixth correction line, crth; south of this line there are twenty-four townships of land, They are covered by the beadwaters of the Rio Chaco or Chasco and the falfa fields have a particularly good devoted to cattle and sheep raising, but the prospects of using a consid erable area of this land for agriculture are very 'avorable. At present there

It may be said, therefore, that in the immediate San Juan valley there ditch. A large area outside of this. of high line ditches.

just east of the 108th meridian. It portant torrential streams, and will brick killins, a saw mill and a roller process flour mill.* It is a very pretty, go ahead place. Its citizens are full chantable coal. All that seems to be chantable coal. All that seems to be 10.000 or 12,000 acres are already under ditch, and it would not be wise of energy and public spirit. under ditch, and it would not be wise to advise large settlement on any new lands, unless some scheme were devised by which the whole amount of the water could be handled by some comprehensive authority. This well cultivated homesteads at the river flews thirty miles within San head of the La Plata valley. On the bureau of immigration can state on western side the land rivers in three begin at Cox's crossing and take in a terraces, one over the other, every strip varying from a quarter of a one or which is highly cultivated mile to three miles in width and The sight would remind one more of about twenty five miles in length. The Animas has a minimum flow of 2000 cubic feet per second. One of the peculiarities of this and the San Juan river is that the bottoms are composed of beds of small round, ground Alfalfa and fruit are the water-worn boulders of unknown the county is a very picture in its depth. More water flows in this boulder bed than on the surface. Along in the river valley proper also thought well of it, and many of their monuments in the shape of their monuments in the shape of camps of Colorado and splendid min- land, the most important area of rudely pictured and sculptured rocks land, the most important area of which is from Aztec to below Flora Vista.
